Greenburg – Print and play

Every piece of the game, ready to print, cut out and assemble to play at the table with 3 or 4 players. The rules are in the app's manual and in the rulebook.

How to print

1. Print on A4 paper at 100% (actual size, without fitting to the page).
2. Print pages 2–7 double-sided, flipping on the long edge: the backs are already mirrored and land behind their fronts.
3. Print the other pages single-sided.
4. 160–220 g/m² card works best. With plain paper, glue the sheets onto thin card (a cereal box will do) before cutting. Without a duplex printer, print the backs separately and glue them behind the fronts, lining them up against the light.
5. Cut along the grey lines: identical pieces sit side by side, so each cut separates two of them.

What you need

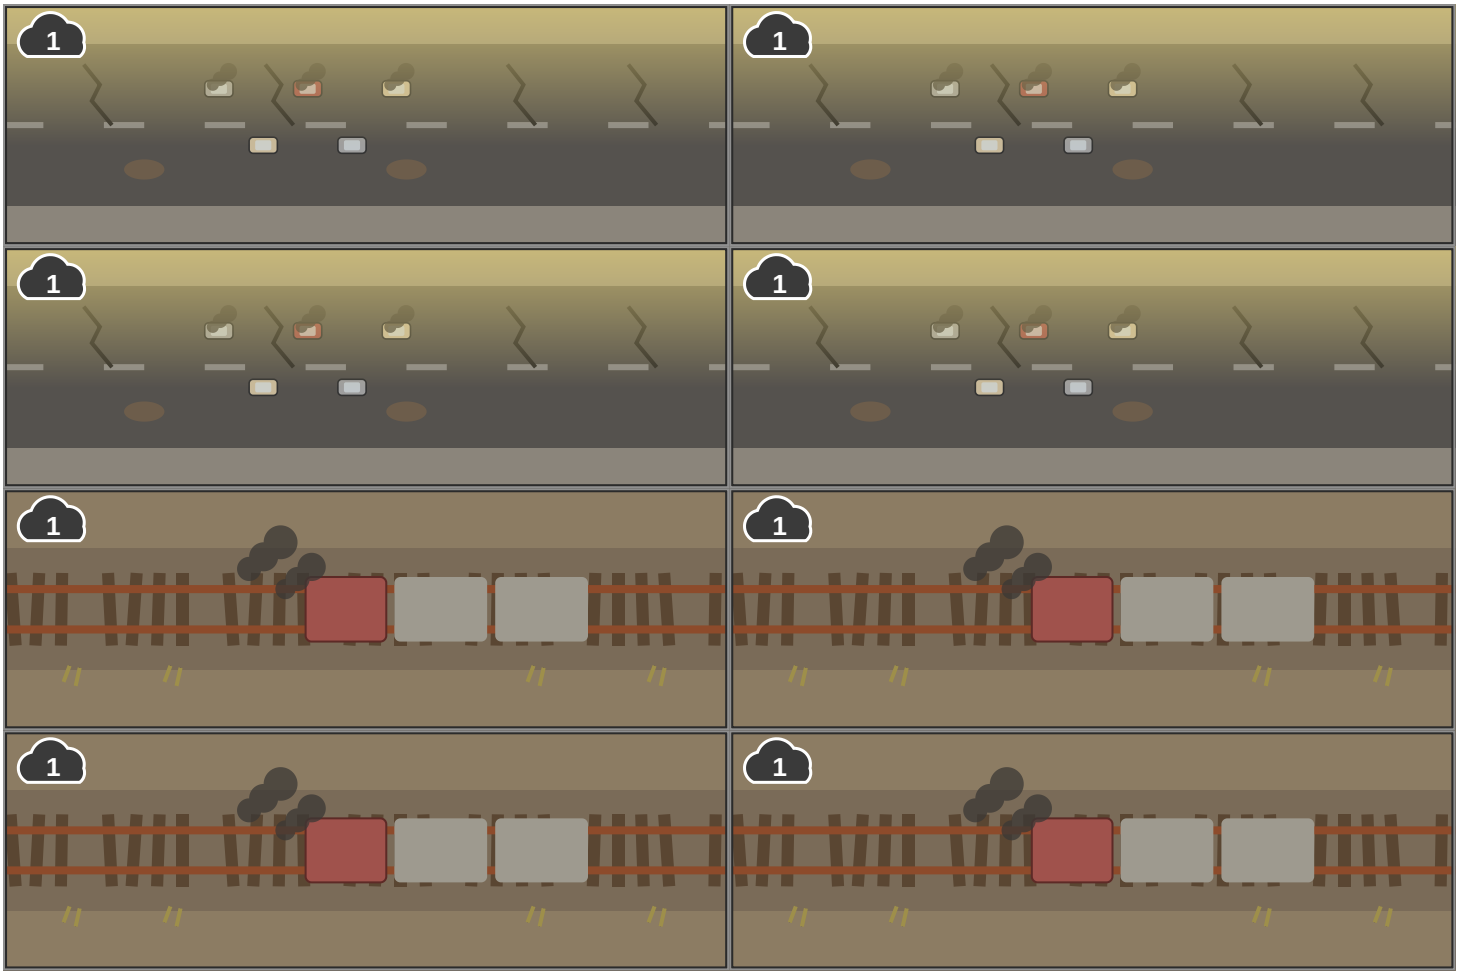

Scissors, or a craft knife and a ruler; a glue stick; a bag or a cup to draw the buildings at random.

Contents

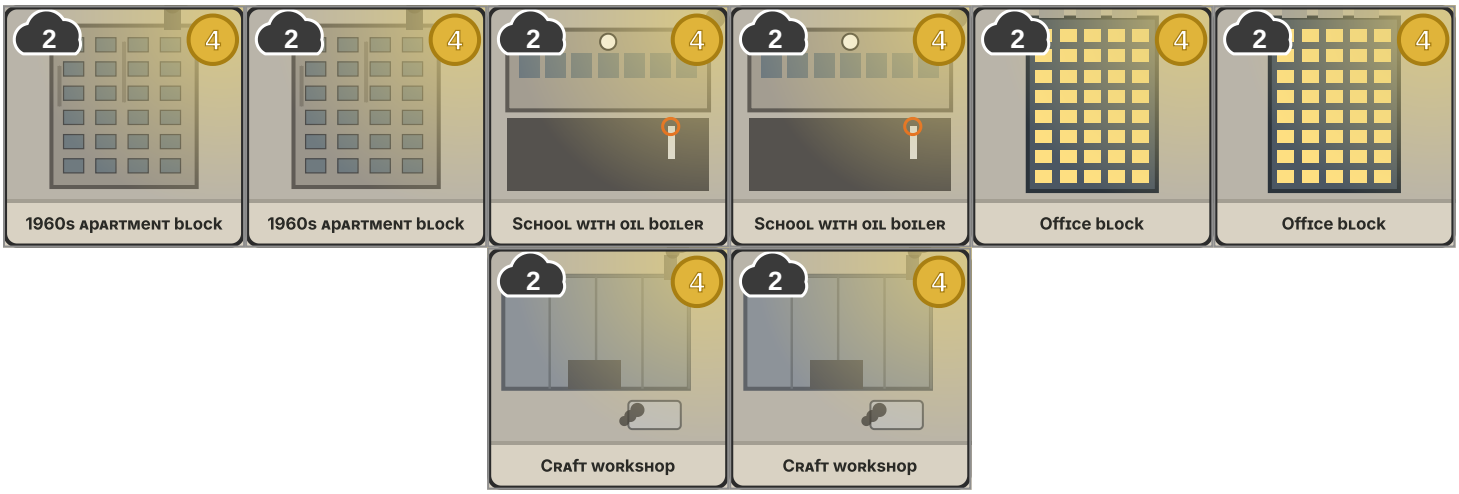

PIECE	QUANTITY	PAGES
Network tiles (road and railway)	8	2
Building tiles	8	2
Grey land tiles	24	2, 4
Infrastructure tiles	36	4
Investment cards	6	6
District tiles	4	6, 8
Role cards	5	8
Score track and city emissions track	2	9
Year track and personal emissions tracks	5	9
Tokens (completed networks, Key to the City, Year, Threshold)	5	10
Emissions cubes and score pawns	8	8
Credits (40 of 1, 10 of 5)	50	10

With 3 players, leave the Station District, one road section and one railway section in the box; grey tiles, buildings and Investment cards are drawn at random as described in the setup.

INFRASTRUCTURE

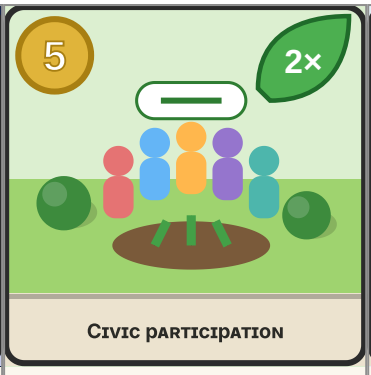

INVESTMENT CARDS

Satellite monitoring

The satellite watches the district's roofs and heat and certifies its decarbonised buildings.

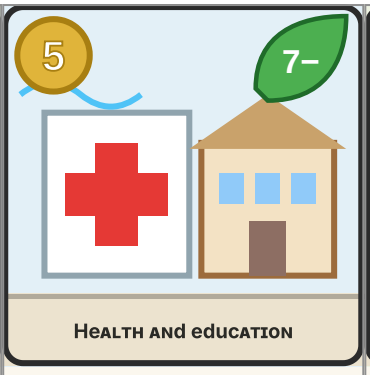

At the end of the game, 4 points for each decarbonised building in your district (8 at most).

Civic participation

Neighbourhood assemblies and care agreements: residents look after the green spaces.

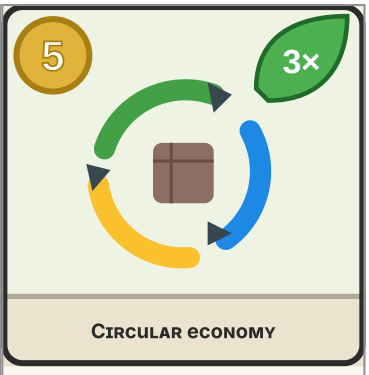

At the end of the game, 2 points for each Green infrastructure in your district (8 at most).

Health and education

Cleaner air, less illness: clinics and schools measure the benefits in the district.

At the end of the game, 7 points minus your district's emissions (0 at least).

Circular economy

Reuse, recycling and recovered materials: the worst polluters become resources.

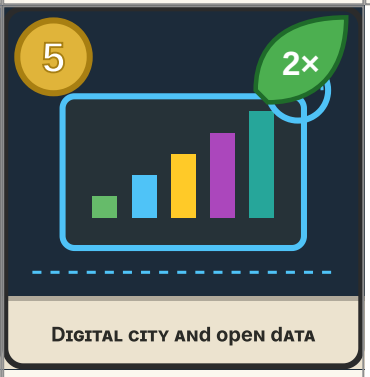

At the end of the game, 3 points for each area worth 2 turned into Mobility or Energy (6 at most).

Covenant of Mayors

The city commits, together with other European cities, to cutting its emissions.

If the city reaches the threshold: 4 points, plus 2 for each year ahead of 2030 (8 at most).

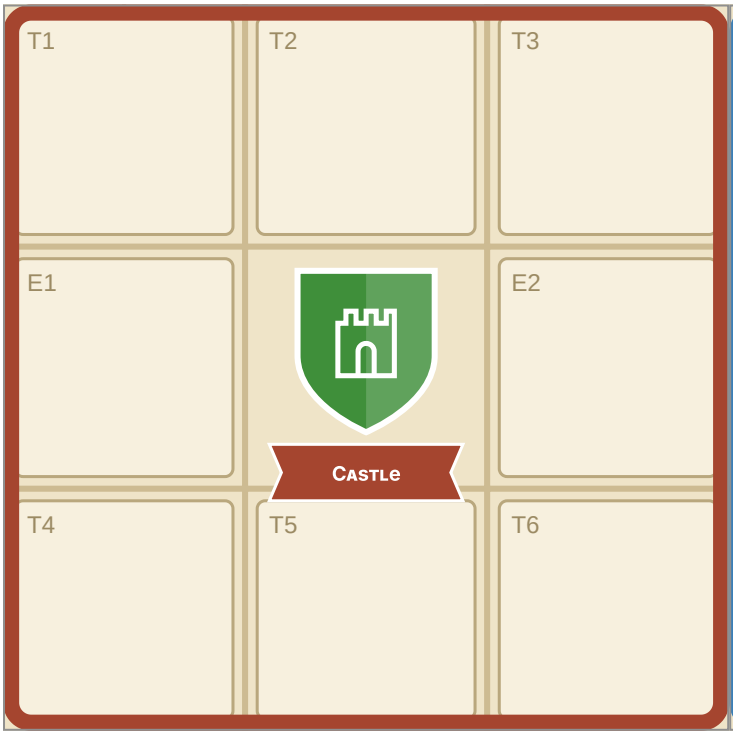

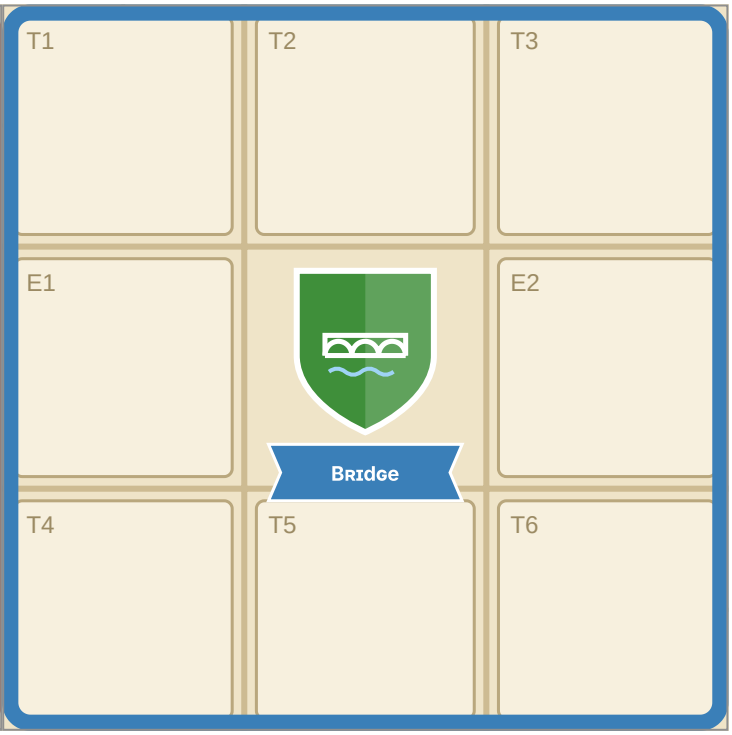

Digital city and open data

Sensors and open data show everyone, in real time, how the district is changing.

At the end of the game, 2 points for each kind of intervention done: Green, Mobility, Energy, retrofitted building, renewed network (10 at most).
